

Radio protocol for OEC class

General Rules: This is hill specific stuff
You are on the PA system
Never use diagnosis words
Give no more information than required

Dispatch, this is National Bill

Go ahead for dispatch

I have a patient with an

- Upper extremity injury
- Lower extremity injury
- Laceration
- Medical complaint
- Chest pain
- Possible spinal problem
- Having respiratory difficulty
- Possibly severe trauma

I am at:

- 150' west of Roundhouse tower 5
- Half way down Mariposa on skier's right
- At the top of Silver Belt
- On the deck at the day lodge
- Exam Station 5

I need a:

Sled	contains two cardboards, quick splint, padding, duct tape and two blankets. Comes with an assistant.
Backboard	with c-collars and head rolls and three assistants
Oxygen	with regulator, masks, and suction but not ambu-bag
Aubu-bag	separate call since we only have a few
Traction splint	brings a Sager
Airplane splint	brings plywood splint
Management	for illegal activity, skier collisions, lift-related incidents and all incidents involving all man-made objects and structures.
Emergency transportation	only for immediate threat to life. Candidate will make the call and the evaluator will respond with time line. Eg. "Helicopter will arrive in ten minutes" or "ambulance will meet you at the base of the hill."

Location Note:

Any accident which occurs within the maze for a lift or on the unloading ramp of a lift is lift-related and must be reported to the PUC, requires photos, etc.
